

# Kevin Eugene

Designer & Engineer

## About me

I am a creative and passionate designer from France, always looking for new and exciting adventures!

I love good food and enjoy long contemplative walks. I spend most of my time writing stories and designing.

## Thoughts

I see design as the intersection of **creativity** and **technology**.

Thanks to my background in Computer Engineering and Business, I can connect design to real **business goals**, and bring **delight** through beautifully crafted experiences, from the prototype to the actual implementation.
